

## **LoMg Dolo Xtra Fine Columbia, CA**

*LoMg Dolo Xtra Fine is a safe, effective way to correct acidic soil conditions without dramatically increasing Magnesium Levels. It is recommended in balanced soil fertility management programs.*

### **Blue Mountain Minerals** *LoMg Dolo Xtra Fine*

- Ground Dolomitic Limestone contains both Calcium and Magnesium Carbonate in a ratio near 3:1.
- Higher Mg levels in low CEC, sandy soils can help retain water.
- Improves soil pH to a more balanced level helping to promote nutrient availability.
- High Oregon Lime Score due to CCE, smaller particle size and low moisture.
